KEVIN EASTER RAJ.A

Aspiring Web Developer : Passionate about Coding and Problem Solving, and Creating innovative Web solutions.

EXECUTIVE SUMMARY

Dedicated and results-oriented Web developer with a strong foundation in Python, Java languages. Proven ability to quickly learn new technologies and apply them to practical solutions. Eager to contribute to innovative projects and collaborate effectively within a team.

INTERNSHIP

Apex Seekers, Chennai   June-August 2024

Gained hands-on experience in Python programming, working on real-world projects, debugging, optimizing applications, and collaborating with a team while following industry best practices.

PROJECTS

Library Management System - Built using Python

Proficient in Python, developed a comprehensive library management system using CRUD operations. Efficiently managed library records, ensuring data integrity and user-friendly interface.

ECommerce website - Built using HTML , CSS and JS

Designed a responsive Front-End Project using HTML for structure, CSS for styling, and JavaScript for interactive functionality.

Proctor AI Website - Built using Python and Django

PROCTOR AI ensures online exam integrity by monitoring eye/head movements using JavaScript and SVR, automatically disqualifying students for detected irregular behavior to enhance reliability.
